

My Simple Challenge Instructions to make you a Instant Programmer
Print this so you can follow step by step

Here is my simple challenge, especially if you are hesitant to try. Go to this page <http://www.acopa.ca/> scroll to the bottom of the page, log-in to the ACOPA web page with the ID and password information that was supplied. Go to the top menu either C.O.P.'S or RESOURCES and click the "Down facing arrow head" and click on C.O.P. Groups. Next, scroll down until you find your location above a Logo then click on the logo. There will be an <Edit> tab, click the edit tab and scroll down to the <Body> text box and type " Hello ". Scroll to the bottom of the page and click either <Save> or <Preview>.

Voila!! you have become an instant programmer.

If you clicked <Preview> just keep on editing, remove " Hello " go to the top and start filling in the boxes about your group and click <Save> when done. If you clicked <Save> after you typed " Hello " click <Edit> again and continue as per last sentence.

The Log-out is in the Members Menu at the upper right.
